CONSIDER

After uploading media, remove the originals from the phone gallery.

EXAMPLE

Camera gallery and cloud storage. As a user, I don't want to keep photos and videos stored on my phone because they take up a lot of space and I don't want other people to see them.

Instead, I want the original files to be automatically removed from my gallery when I upload them to the cloud. I only want the ones I mark as favorites to be stored on my phone.

STORAGE
