

WIND

OFF-GRID SERVICES FOR EVERYDAY PEOPLE

**WE'RE BUILDING NETS THAT
UTILIZE THE FULL POTENTIAL
IN THE ADVANCED RADIOS,
SENSORS AND PROCESSING
POWER AVAILABLE IN THE
CHEAPEST SMARTPHONES AND
ROUTERS AVAILABLE AROUND
THE WORLD.**

A WINDY NETWORK

IS SHAPED BY THE MOVEMENTS AND DENSITY
OF PEOPLE IN TIME AND SPACE.

COMPONENTS OF A WINDY NETWORK

WIND CHIME MESSAGE & MAP

Helps individuals discover and locate other people and services who are near them.

Connects people within a certain range to share knowledge and content with each other.

Provides a way for people to chat offline, peer-to-peer. Messages are spread directly from one individual to another using bluetooth and wifi direct.

WIND STORE DISTRIBUTE

Connects people who are in the same room, so that they can exchange apps and other important files from their phone offline.

WIND BOX GATHER & SHARE

Gathers people in a shared location to exchange content. Individuals connect to a physical hub to get and share stuff to pass along to others

WIND REPORT CAPTURE EVIDENCE

Allows any eyewitness to report on recovery and relief efforts, interview refugees, and capture corruption or abuse of power evidence with verified photos and videos.

WHY IT MATTERS

WHEN DISASTER STRIKES, PEOPLE NEED TO STAY CONNECTED

SURVIVOR

Joseph, a survivor, is constantly trying to find the best food, shelter and services for his family, while keeping up-to-date with where and when services are being offered by relief organizations.

COMMUNITY ORGANIZER

Rakesh, a community organizer, has taken on the local leadership role for the town, which was mostly reduced to rubble during the disaster. With limited electricity and no working mobile service, he has a hard time getting frequent news and updates from other coordinators.

MEDICAL RESPONDER

Rene, a medical responder, is providing first aid and basic medical procedures to people at relief centers in the affected region. He needs access to medical materials, along with the means to communicate with other responders to ask for help, advice and supplies.

JOURNALIST

Pema, a journalist, in the days after the disaster, has been sent on assignment to interview those affected, and keep up with the latest developments in the recovery process. She is new to the area, and finding it difficult to know where to go to find specific people.
